PIONEER OF AVIATION TECHNOLOGY

Acharya Bharadwaj had a hermitage in the holy city of Prayag and was an ordent apostle of Ayurveda and mechanical sciences. He authored the "Yantra Sarvasva" which includes astonishing and outstanding discoveries in aviation science, space science and flying machines. He has described three categories of flying machines: 1.) One that travels on earth from one place to another. 2.) One that travels from one planet to another. 3.) And One that travels from one universe to another. His designs and descriptions have impressed and amazed aviation engineers of today. His brilliance in aviation technology is further reflected through techniques described by him:

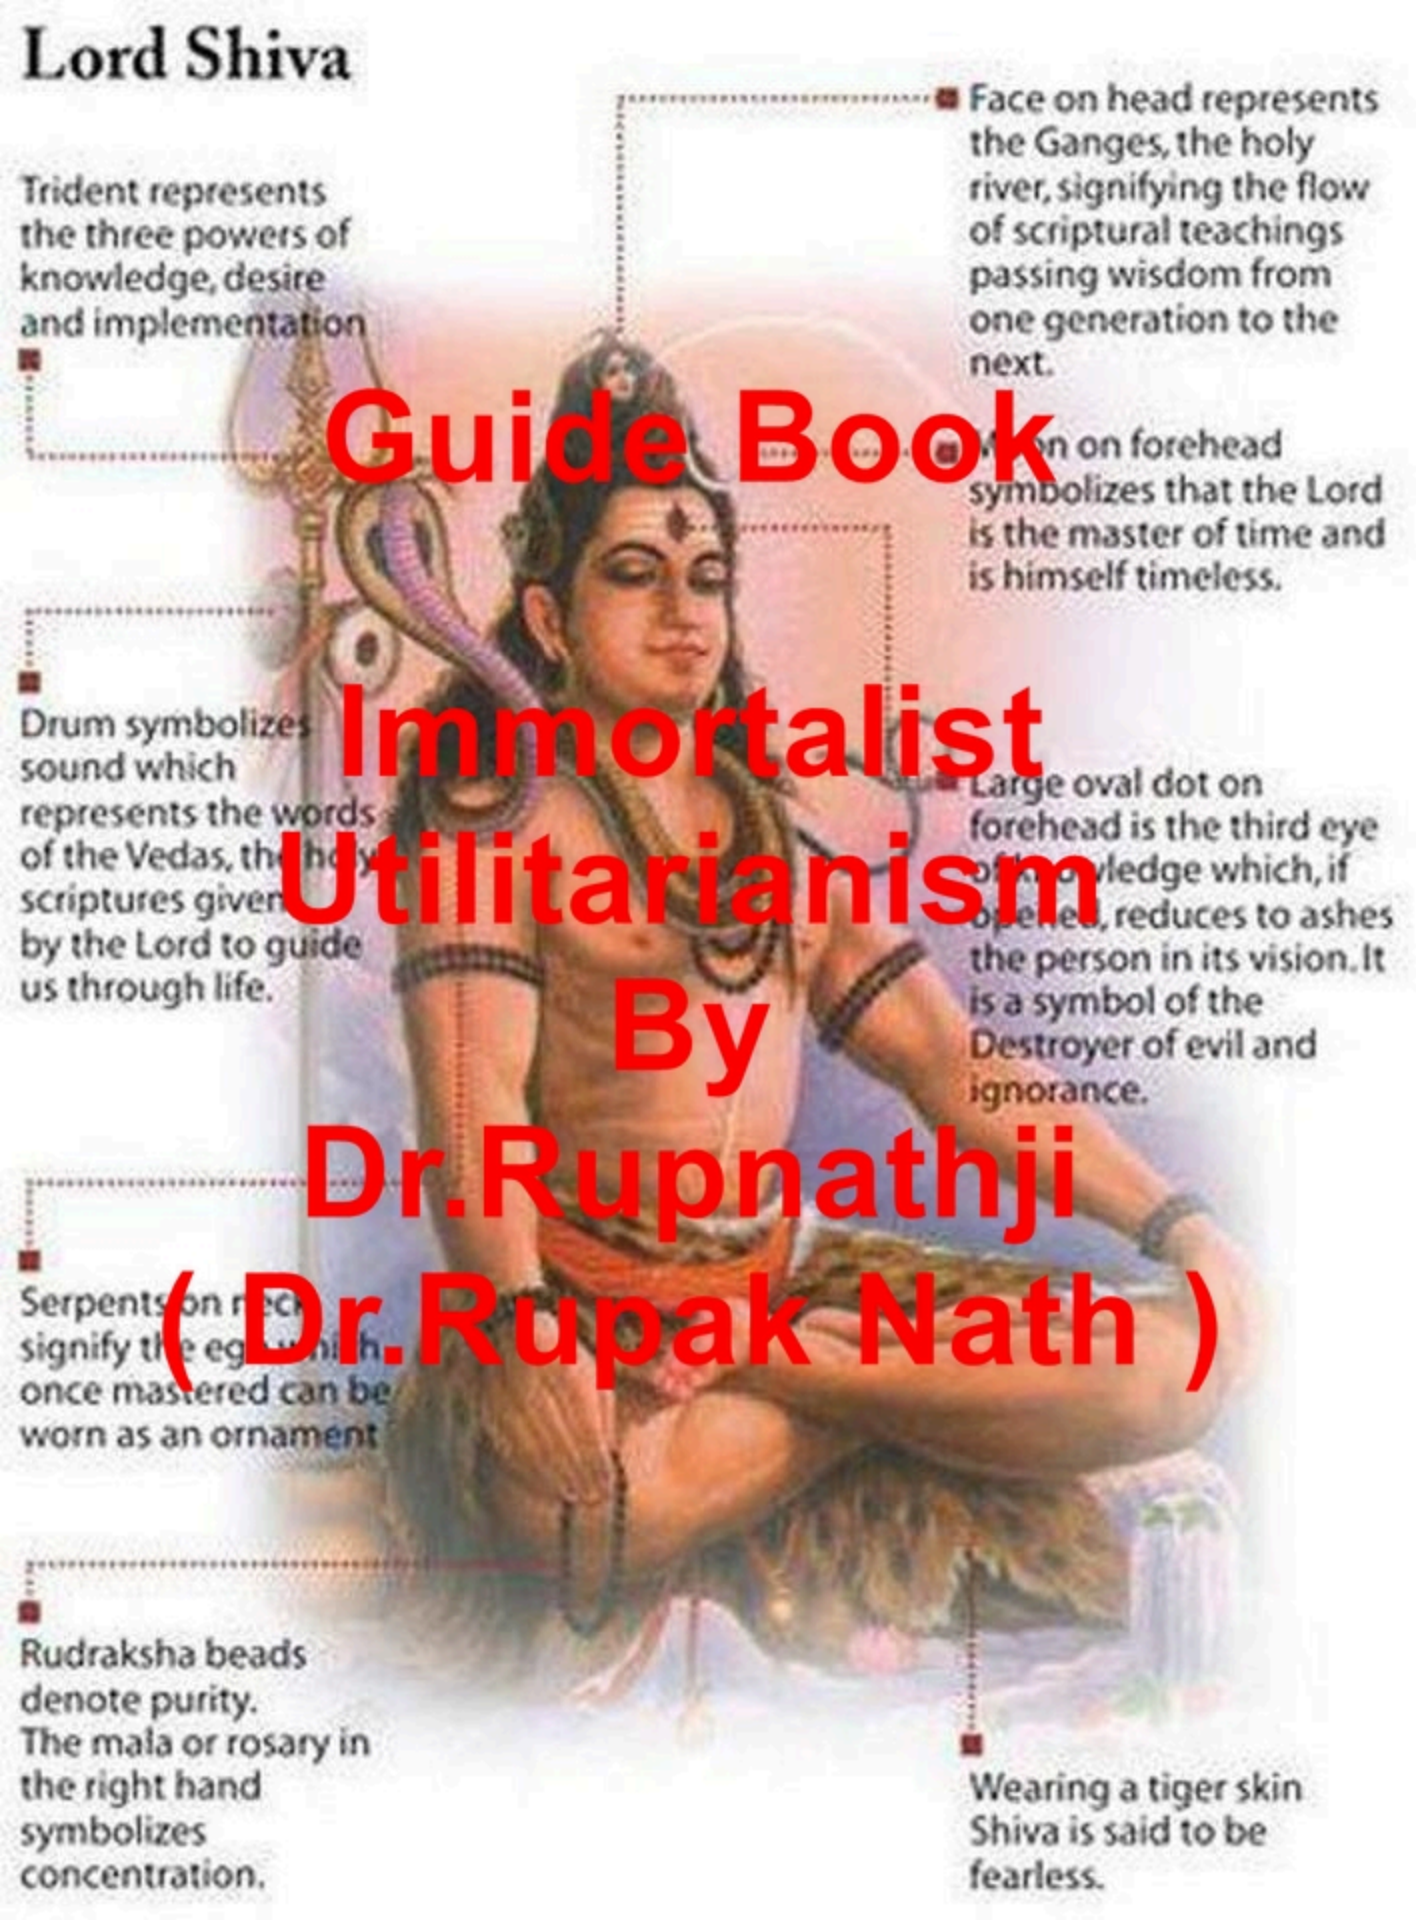
1.) Profound Secret: The technique to make a flying machine invisible through the application of sunlight and wind force.

2.) Living Secret: The technique to make an invisible space machine visible through the application of electrical force.

3.) Secret of Eavesdropping: The technique to listen to a conversation in another plane.

4.) Visual Secrets: The technique to see what's happening inside another plane.Through his innovative and brilliant discoveries, Acharya Bharadwaj has been recognized as the pioneer of aviation technology.

Lord Shiva



Trident represents the three powers of knowledge, desire and implementation

Face on head represents the Ganges, the holy river, signifying the flow of scriptural teachings passing wisdom from one generation to the next.

Moon on forehead symbolizes that the Lord is the master of time and is himself timeless.

Drum symbolizes sound which represents the words of the Vedas, the holy scriptures given by the Lord to guide us through life.

Large oval dot on forehead is the third eye of knowledge which, if opened, reduces to ashes the person in its vision. It is a symbol of the Destroyer of evil and ignorance.

Serpents on neck signify the ego which, once mastered can be worn as an ornament

Rudraksha beads denote purity. The mala or rosary in the right hand symbolizes concentration.

Wearing a tiger skin Shiva is said to be fearless.

ACHARYA BHARADWAJ (800 BCE)

PIONEER OF AVIATION TECHNOLOGY

Acharya Bharadwaj had a hermitage in the holy city of Prayag and was an ordent apostle of Ayurveda and mechanical sciences. He authored the "Yantra Sarvasva" which includes astonishing and outstanding discoveries in aviation science, space science and flying machines. He has described three categories of flying machines: 1.) One that flies on earth from one place to another. 2. One that travels from one planet to another. 3.) And One that travels from one universe to another. His designs and descriptions have impressed and amazed aviation engineers of today. His brilliance in aviation technology is further reflected through techniques described by him:

1. Profound Secret: The technique to make a flying machine invisible through the application of sunlight and solar force.

2.) Living Secret: The technique to make an invisible space machine visible through the application of electrical force.

3.) Secret of Eavesdropping: The technique to listen to a conversation in another plane.

4.) Visual Secrets: The technique to see what's happening inside another plane.Through his innovative and brilliant discoveries, Acharya Bharadwaj has been recognized as the pioneer of aviation technology.
